Jean Bertrand Habinshuti

Senior Intelligent Automation Engineer
habertbertrando7@gmail.com | (+420) 777092540

About me

Senior Intelligent Automation Engineer with 7+ years architecting enterprise-grade automations using UiPath Suite, Microsoft Power automate, AI Frameworks such as langgraph, n8n etc., and AI/LLM integration across insurance, logistics, pharmaceutical, and energy sectors. Currently leading AI experimentation, embedding AI Agents and LLMs into RPA workflows. Experience with Intelligent Document Processing (IDP) using UiPath OCR and Microsoft AI Builder to extract data from invoices and unstructured documents and sources such as emails with high accuracy. Proven track record integrating advanced orchestration platforms with legacy systems (SAP, ERP, APPIAN) via robust APIs, establishing HITL frameworks, CI/CD pipelines, and ELK monitoring for scalable deployments.

CORE COMPETENCIES

Automation Platforms: UiPath Suite (Studio, Orchestrator, REFramework) | n8n and langgraph | Microsoft Power Automate | AI Builder
AI & Cognitive: LLM Integration | AI Agents and AI Engineering | Prompt Engineering | UiPath OCR/IDP | Document Extraction
Integration & APIs: REST/SOAP | Legacy Systems (SAP, ERP, APPIAN, Blackline, etc) | Multi-system Data Bridges
DevOps & Cloud: Azure DevOps | GitHub | GitLab | Terraform | Docker | Kubernetes | AWS (S3, VPC, EC2, RDS, IAM)
Programming: Python | JavaScript | C# | PowerShell | Linux Bash
Tools & Process: BPMN 2.0 | Enterprise Architect | ELK Stack | Confluence | Jira | ServiceNow | PDD/SDD Documentation
Data: PostgreSQL | SQL Server | MySQL | MongoDB | elasticsearch **Methodologies:** Agile Scrum | SDLC | ITIL V4 | DevOps Foundation

PROFESSIONAL EXPERIENCE

Senior RPA & Intelligent Automation Engineer | VIG RE Zajišťovna, a.s.

September 2024 - Present | Prague, Czech Republic
AI & LLM Integration:

- Leading AI Agent and LLM integration into RPA workflows using UiPath and Microsoft Power Automate for unstructured data handling in claims, policy analysis, and document classification, email routing
- Architected custom UiPath OCR/IDP solutions extracting data from invoices, policy documents, and forms, processing a large amount of documents monthly
- Designed POCs validating AI feasibility and business impact; optimized LLM prompts ensuring accurate outputs
- Ensured governance adherence through collaboration with Infrastructure and Compliance teams

Automation & Process Delivery:

- Developed end-to-end intelligent workflows using UiPath Studio, Power Automate, AI Builder, APIs, and databases
- Created standardized BPMN process models in Enterprise Architect; authored PDD, SDD, IQ, and UAT documentation
- Implemented CI/CD pipelines for DEV/UAT/PROD deployments; executed comprehensive testing (unit, integration, UAT, smoke)

Stakeholder & Business Enablement:

- Partnered with HR, Finance, IT, Operations to identify automation opportunities
- Gathered requirements, delivered solution demos, and translated operational pain points into scalable technical solutions

---

DevOps Engineer (Freelancer) | HCL Tech

January 2024 - September 2024| Prague, Czech Republic

- Automated SDLC workflows (change management, documentation, approvals) reducing cycle time
- Architected **Terraform** scripts provisioning AWS services (S3, VPC, EC2, RDS, IAM) across multi-account environments
- Developed API integrations between ServiceNow, Jenkins, and AWS; built ELK dashboards with custom alerts for performance monitoring
- Managed CI/CD pipelines in Jenkins and CloudBees for secure deployments (DEV, UAT, PROD)
- Optimized PostgreSQL databases (query tuning, integrity validation); collaborated in Agile Scrum teams

---

RPA & Infrastructure Automation Engineer | RWE Supply & Trading

June 2022 - December 2023 | Prague, Czech Republic

RPA Development:

- Conducted POCs, designed/deployed production UiPath automations following SDLC (PDD, SDD, UAT); improved bot reliability through exception-handling and self-healing workflows

- Architected API connections linking SAP and other Systems; trained junior engineers on REFramework and Orchestrator best practices
- Implemented Azure DevOps CI/CD pipelines reducing deployment time from hours to minutes; introduced Git standards across Prague, Essen, London teams
- Created reusable automation libraries accelerating development time; built ELK stack from scratch for real-time bot monitoring and KPI tracking

Infrastructure as Code:

- Designed Terraform modules for AWS multi-account provisioning (S3, IAM); established automated vulnerability scanning (Renovate bot)
- Built CI/CD pipelines for .NET libraries, front-end apps, and RPA robots supporting Testing, Staging, Production environments

---

Intelligent Automation Engineer | MSD Czech Republic (Merck)

January 2019 - July 2022 | *Prague, Czech Republic*

- Delivered enterprise-scale UiPath solutions across EMEA, APAC, Americas for global pharmaceutical leader
- Designed workflows automating tasks across Excel, SAP, APPIAN, Blackline and other applications, reducing processing time
- Partnered with international Agile squads (Scrum Masters, PMs, Business Analysts) to translate Finance, Supply Chain, Compliance requirements into production deployments
- Conducted demos; performed code reviews ensuring security and best practices
- Leveraged **Azure DevOps**, Git, Jira, Confluence for CI/CD, version control, and knowledge management

---

Software Developer | DXC Technology

August 2018 - January 2019 | *Prague, Czech Republic*
Provided application support and feature development for enterprise clients (Northern Europe, South-East Asia); enhanced Cass Link application with new features in agile sprints.

EDUCATION

Master's Degree in Applied Informatics | Information Systems Management
Minor in Economic Data Analysis
Prague University of Economics and Business | 2018 - 2020

Bachelor's Degree in Systems Engineering and Informatics
Czech University of Life Sciences (CULS), Prague | 2015 - 2018

Exchange Program (Erasmus+) | Business and Information Technology
Plymouth University, United Kingdom | 2016 - 2017

EARLY CAREER

Software Developer Intern | MSD IT Czech Republic | Jan-July 2019 | **CRM Advisor** | Transavia Airline | July 2017-Aug 2018 | **Amazon ICQA** | Amazon FC logistics | Apr-Sept 2026

LANGUAGES

English: Fluent
French: Fluent
Czech: Fluent
German: Learning (Elementary)

CERTIFICATIONS

AI Engineering (august 2026) - Neuronetworks and Gen AI,Prompt engineering and model benchmarking, model finetuning, Deoloyment and orchestration | **AI Agents Development** (Nov 2025) - Python, LLM API, LangChain, LangGraph, n8n, Multi-agent Coordination, Reinforcement Learning |
UiPath Specialized AI Training (2024-2026) - Verified Credential
UiPath Certified RPA Developer (2019) | **Blue Prism Foundation** (2022)
DevOps Foundation (2021 - DevOps Institute) | **AWS Cloud Technical Essentials** (2022) | **ITIL 4 Foundation** (2021 - AXELOS)
